PROJECTS

Full-Stack Portfolio Web Application 🔗

Web technologies-HTML, CSS, Bootstrap, React.js, Node.js | Database -MongoDB ATLAS

- Built a **responsive** portfolio application showcasing projects, experience, certifications, and a contact form
- Developed a secure **admin dashboard** to add/manage content without direct database access
- Implemented **JWT**-based authentication for protected admin access
- Designed a testimonial system, testimonial from user will be approved/rejected before public display
- **Deployed** the application on Render using **git** and **github** for quick accessibility

CERTIFICATES/COURSES

SQL

HackerRank
2024

- Dealed with time based SQL Problems to get certified

DSA

Geeks for Geeks
2023

- Solved Number of Problems to get certified

EXPERIENCE

Working for a top US bank

Mphasis

02/2026 – Present | Pune, Maharashtra

Domain: Angular

- Working in an enterprise-scale Angular application environment with a Top US bank (under fortune 500)
- Collaborated closely with developers by shadowing ticket resolution, debugging, and UI enhancements
- Contributed in CI/CD workflows, including code integration and deployment using Jenkins

Resume Builder

Mphasis

10/2025 – 02/2026 | Pune, Maharashtra

Domain: Fast API, React, Crew AI

Description: Built a full-stack app with drag-and-drop resume/JD uploads, real-time status tracking, and smart error handling. Developed frontend features like file previews, progress indicators, and in-browser downloads, alongside backend APIs for task orchestration, validation, and multi-agent Crew AI pipelines with logging and fallback support.

Responsibilities:

- Contributed in building a responsive and user-friendly UI using React
- Integrated and worked with backend APIs.
- Improved processing time for job description analysis and result generation
- Developed structured, downloadable documents based on predefined templates

PUBLICATION AND PROJECT

Continuous Health Monitoring for Early Stroke Prediction at Home, 2024 (ICEECT) 🔗

01/12/2023

- Used ML models trained on Kaggle datasets to predict stroke risk from user data
- Developed a Flask platform, improving monitoring and reducing hospital visits
